

ERIC SHIN (KYOUUNGJAE)

329 Coronation Road, Whitby, ON | (647) 530-8134 | rudwo8134@gmail.com

Full-Stack Developer with 4 years of experience in building scalable mobile and web applications using React Native, TypeScript, React, JavaScript, and Node.js. Highly skilled in development, including UI/UX design, state management, API integration, performance optimization, and cloud deployment. My expertise lies in React Native, where I've led the development and deployment of over six successful applications for both the Android and IOS. I thrive on creating scalable and I enjoy tackling complex challenges in fast-paced environments. With a keen eye for detail and a passion for technology, I aim to build products that make a meaningful impact.

EXPERIENCE

2021 - Present

Speer | Full stack developer | Toronto, Ontario

- Led development of web and mobile applications using React Native, React, and Node.js.
- Supported deployment and maintenance of over six mobile applications on Android and iOS platforms.
- Collaborated with cross-functional teams to enhance features, optimize code quality, and deliver seamless user experiences.

2019 - 2021

Siemens Ruggedcom | Telecommunication technician | Vaughan, Ontario

- Provided technical support and maintenance for rugged telecommunication systems by creating detailed reports on unit issues for Test and QA teams, testing prototypes during pre-test and final phases with Siemens software using C#.

EDUCATION

2021 – Present

bachelor's degree, Software engineering | McMaster University

2016 - 2019

Associate's degree, Electronics engineering technology | Centennial College

SKILLS

- Programming Languages: TypeScript, JavaScript, Swift, Kotlin, HTML, CSS
- Frameworks and Libraries: React Native, React, Node.js, Angular, Vue.js

KEY PROJECTS

Baker Health: Developed a React Native app for patient-doctor real-time connections.

Netcoins: Improved a crypto app with 100,000+ users.

DefinedLogic: Created a Florida-based rental app using React Native.
